PRODUCT INFORMATION SHEET

Stearic Acid Powder

Product Description

Stearic acid is a fatty acid supplied in solid form. It is used in various industrial and formulation applications, including as a lubricant in pharmaceutical tablet manufacturing.

Typical Application

In tablet formulations, stearic acid may be used as a lubricant to reduce friction during compression and help tablets release from the tablet press. Suitability depends on the material's grade and the requirements of the specific formulation.

Product Characteristics

- **Product name:** Stearic Acid Powder
- **Chemical name:** Stearic acid
- **Appearance:** Typically a white to off-white solid powder

Handling and Storage

Keep the container tightly closed and store in a cool, dry place. Avoid generating or inhaling airborne dust. Follow the supplier's handling recommendations.

Important Information

This sheet provides general product information only. Specific purity, grade, and suitability for pharmaceutical or other applications should be confirmed against the supplier's specifications. This document is not a Safety Data Sheet (SDS) and does not replace applicable safety documentation or product specifications.
